

RoHS, WEEE & REACH

Position Statement

Sascal Displays is committed to the design, manufacture and marketing of electronic products that are environmentally stable and friendly throughout their entire life cycle. These products are in compliance with RoHS, WEEE and REACH regulatory and statutory requirements.

Sascal Displays Ltd supports the initiatives of the “Restriction on the use of certain Hazardous Substances” (RoHS) in electrical and electronic equipment, the European Union on “Waste Electrical and Electronic Equipment” (WEEE), and Regulation (EC) No. 1907/2006 of the European parliament and of the Council of 18 December 2006 concerning the; Registration, Evaluation, Authorization and Restriction of Chemical (REACH) substances.

The RoHS directive restricts the use of specific hazardous substances in the manufacture of various types of electrical and electronic equipment while the WEEE directive classifies electrical and electronic equipment and sets requirements for collecting, recycling and recovery for WEEE purposes. Although Sascal Displays’ products are included within the scope of the RoHS directive, only a few of our products are within the scope of the WEEE directive, however we believe it is in the best interest of the world community for all Sascal Displays products to fully conform to both directives.

We are therefore in the process of eliminating the restricted hazardous substances from our existing products in addition to designing all new products in line with RoHS/WEEE compliancy.

Issued by the Quality Assurance Department
and authorised by the Board of Directors.
